

Senior Embedded C Developer

For our client in the area of Arnhem, we are urgently looking for a Senior Embedded C, C++ and C# Developer!

Samenvatting

- Vacature nummer: PUB206849
- Markt: Industrie
- Branche: High Tech
- Expertisegebied: Embedded Software
- Uren per week: 40
- Opleidingsniveau: HBO
- Sluitingsdatum: zondag 21 april 2019

De functie

Our client has started the development of a totally new generation of Clinical Chemistry Systems for which new firmware needs to be developed. Next to firmware development the application software is also developed in-house. Currently the software team consists of 10 persons and they are looking for expansion of the software team.

Together with this team you will design and implement software, which you need to report an document according to the applicable quality systems and regulations (ISO 9001/13485, IEC62304, FDA 21CFR820). Development and improvement of internal tooling like simulators and test tools are also part of the job. Of course it is important to maintain and improve the software of the existing systems based on problem reports and engineering.

Over jou

- Demonstrated experience in the field of embedded software development in a multidisciplinary team
- Strong knowledge of real time aspects and programming language C /C++
- Knowledge of the programming language C#.Net
- Knowledge of design methodologies such as OO and UML
- Preferably graduate level, Computer Science and Engineering or Technical Computer Science
- Preferably experience with medical software development according to IEC 62304
- Preferably experience with BDD / TDD development approach
- Preferably experience with Agile development approach
