De functie

Within the application software group as part of the electronics department, we are looking for an enthusiastic senior software designer who will work together with the existing team in developing the embedded Linux application software

for one of our future products. As a senior software designer you are responsible for working with a focus on consumer needs and technological competitiveness, keeping an outside-in approach in mind for the designs you create. You also will be responsible for the design, realization, integration and test of the embedded Linux system.

Over jou

- You have a master degree in SW Engineering, Informatics, or equivalent
- 7 to 10 years of relevant work experience in (networked) prototype or product development
- Proven track record with development methodologies like Agile/Scrum and eXtreme Programming (especially test driven development/mocking and continuous build & integration)
- Experience with C++ programming language
- Proven track record of object oriented analysis and design
- Strong technical skills in software development on an embedded Linux platform

Wat wij bieden

Being intermediated by Brunel means that you are contracted by Brunel. Not only you will have a contract, you will as well be assured of a great career! Our primary and secondary terms of work are excellent. A few examples are price reductions at CZ Health Insurance, bonus opportunities and standard 26 days off. Brunel engineering intermediates both junior and senior engineers within the industry for over 30 years now. Our clients vary from multinationals to local companies. Together we will find the job which meets your wishes.
